

ELECTRONIC ART FILES

Computer Disk File: We are both Mac and PC based. When sending us a file via email, floppy disk, zip disk or CD, please follow these important instructions.

Screen Print or Applique and Digital Jobs: (*Mac or PC files*) All files must be vector! This means that the files must be comprised of outlines and not pixels. All lettering within files must be converted to outlines also so as to avoid font confusion. Acceptable file types include: .ai, .cdr, .plt, and most .eps files. This artwork can be emailed to kevin@peoriaflag.com

Program Specifics

1. Adobe Illustrator 9.0 or less vector files. 2. CorelDraw 11.0 or less vector files (*PC only*) 3. Macintosh CorelDraw files that have been exported as Illustrator files. 4. EPS vector files from other programs can be sent, however they may need to be altered by one of our graphics professionals for use. In some cases font substitutions may be necessary.
